

## Digital printing on Re-board

Always use gloves when you are handling the Re-board sheets! The finger marks shows on the print.

Make sure that nothing stands up around the edges of the sheet. This will stop the machine from printing.

Re-board sheets can be very dusty. Make sure to use a brush to remove it.

The dust affects the printing result and can even stop the machine.

We have two digital printers:

Inca Columbia Turbo

Resolution: 800 x 1200 dpi

Capacity: 160 m<sup>2</sup>/h

Size: Max 1600 x 3200 mm
